SPOTLIGHT ON....

This half term, we shine the spotlight on....

Concentration Tools

In school, we recognise that some children may require a concentration tool ('fidget toy') to help them concentrate. Concentration tools help children to self-regulate and exercise their impulse for movement without affecting attention and focus. If you feel your child would benefit from a concentration tool, please speak to your child's class teachers or a member of the SEND team.

Please note: All concentration tools should not contain batteries and must fit in to your child's pocket.
